Boys & Girls at Risk
The emerging science of gender differences

Friday, June 15, 2012, 8:30 am–3:45 pm

Physical, neurological and psychological changes are often experienced differently by male and female adolescents. This conference provides valuable information for professionals who work with youth. You'll learn from experts on the latest research, and build skills in the areas of prevention, intervention and treatment from a gender-sensitive perspective.

This conference will help you:
• Communicate more effectively with the other sex as a therapist, counselor, teacher, case manager, mentor or parent
• Learn surprising information on how trauma affects boys and ways to reach boys to help them heal
• Get ‘media savvy’ about the hidden world of teenage cyber culture and how to know when it gets dangerous from a female and a male perspective
• Learn the promising practices for helping female trauma survivors heal
• Acquire an evidenced-based model of intervention that works for teens who are currently using substances

Who should attend: Social workers, psychologists, juvenile justice workers, mental health and addiction counselors, educators, clergy and others who work with adolescents and teens

Keynote presenter:
Cynthia B. Torppa, PhD  
From Exasperation to Satisfaction: Gender Differences in Interpersonal Communication

Breakout sessions:
Steven Sawyer, LCSW CSAC  
On The Edge of Chaos: Intervening with Traumatized Males

Sandy Hardie, CSAC ICS  
Girls & Trauma: The Impact, the Challenges, and the Hope

Richard Guerry, Author  
Public and Permanent: Helping our Youth Become Savvy, Safe and Responsible in the Digital World

Scott Caldwell, MSW and Jason Witt, MS  
Boys at Risk: A Guide for Understanding and Action

Melissa Lopez-Larson, MD  
What Brain Imaging Tells Us About the Differences Between Girls and Boys and the Clinical Implications of These Differences

Fred Garcia, CSW  
Teen Intervene: Using Brief Intervention with Substance-abusing Adolescents—a Facilitator's Perspective
